

TEMPORARY STORAGE

TEMPORARY GRAIN STORAGE >>>

Through Behlen's 80 years of serving agricultural markets, Behlen has been at the forefront of many innovations and improvements in the grain storage industry.

Based on this established tradition, the Behlen temporary grain containment systems are designed with our customer's success in mind.

FLEXIBILITY

The Behlen systems can be configured in a multitude of arrangements to fit into the available space and, if needed, are easily moved to a new location or stored when not in use.

The Behlen system can be installed on slightly unlevel surfaces, reducing the need for extensive excavation saving you money.

LONG LIFE SPAN

The heavy 14 gauge galvanized wall sheets, and hot-dipped 3" x 3" x 3/16" galvanized angle are designed to give many years of use. Perforated trapezoidal panels are used to provide both strength, and air flow, optimizing storage life of the grain pile.

ECONOMICAL

The Behlen temporary storage systems offer a cost effective alternative for short-term grain storage. Coupled with upright long-term grain storage bins, this combination provides flexibility to your grain storage facility and adds profitability by maximizing the amount of grain you can store at harvest.

ENGINEERED FOR EASY INSTALLATION

The wall systems come in 11.5' long sections in 1 or 2 panel heights. The pre-assembled panels are shipped in the leg folded position to save transportation cost. Once on-site, the angle iron supports are unfolded. A typical 100' x 300' x single panel system can be set up in one day.

AERATION EQUIPMENT AVAILABLE UPON REQUEST

Behlen supplied aeration systems offer heavy duty commercial grade fans, with sturdy 24" ducting. A typical system includes axial fans, steel transitions through field cut openings in wall sheets, and 24" corrugated plastic ducting.

When you purchase your aeration through Behlen, we include our exclusive steel flashing, designed to seal field installed 24" transitions quickly.

BEHLEN KNOWS HOW TO KEEP YOUR GRAIN IN AND THE ELEMENTS OUT

GRAIN STORAGE BUILDINGS

Behlen flat storage buildings offer the versatility of storing grain or equipment. They can be designed to meet virtually any grain storage requirement. Behlen engineers can turn all-steel, rigid frame buildings into highly efficient, low-cost grain storage structures, allowing you to store grain up to 20' against building side-walls. Behlen buildings can provide the storage alternative you have been looking for to solve your large storage needs.

GRAIN STORAGE SYSTEMS

Behlen offers large capacity bins with diameters from 16' to 157' and capacities exceeding 1,500,000 bushels. Our bins are offered in a multitude of sizes to ensure we will have the bin you need to meet your storage requirements. With our years of experience we know the importance of quality products and dedication to customer service. We are ready to help you with storage solutions that can assist you in gaining a competitive advantage.

COMMERCIAL HOPPER TANKS

Behlen Hoppers offer flow-through convenience with many of the same features found in our Big Bin® Series. They're designed with state-of-the-art computer technology to ensure strength, ease of assembly, and trouble-free operation. We invite you to compare the features and benefits of these tanks. We believe you will recognize that Behlen tanks provide exceptional value.
